WEB an APP development
(Saylani Mass IT Training
School) (2021- present)

MERN Stack development
(Inciter Tech) (2021- present)
UI,UX(Jawan Pakitan
institute) (certified)
AI (HassanBaig institute) (23-09-2023)

Object :

A MERN stack developer is a proficient professional with expertise in MongoDB, Express.js, React, and Node.js. They design and build full-stack web applications, ensuring seamless integration between the front-end and back-end components. MERN developers create interactive, scalable, and efficient web solutions, often using JavaScript as their primary programming language. They work collaboratively in Agile teams to deliver high- quality software products and stay updated with the latest web development trends and best practices.

Projects

HTML,CSS,JS,BOOTSTRAP,FIREBASE

1. *Toyota Website* : Github:https://github.com/MRMutahir/Toyota.git
Live:https://unrivaled-cucurucho-e5e8e9.netlify.app
